Course cover basic Science subjects of Mathematics, Biology, Physics, Chemistry etc.

PROJECTS

Anybody Search Web App
A customized search engine to search for ANYBODY with an online presence. It was built on the google CSE platform with HTML/CSS, jQuery/JavaScript and PHP. The screens were particularly developed by me. Hosted on Heroku at https://anybody.herokuapp.com

DiabCare Mobile App
It is an app that helps to connect diabetes patients with their physicians. It also aids monitoring, collection of patients' data by the physicians as they can prescribe drugs, chat and relate consistently via the app.

LaQuiz
A simple Quiz app which was modelled after the 'Who Wants to be a Millionaire" game with a reward of coins and one of those on the leadersboard. Hosted on Heroku at https://laquizz.herokuapp.com
